#### DETALIED ACTION

### Claim Objections

Claim 4 is objected to because of a typographical error: "denot" is incorrect and should be changed to --denote--. Appropriate correction is required.

## Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2, 4 and 5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. Specifically, Applicant's have not defined terms a, b, and c in either the specification or the claims. In the absence of a working definition for these terms, Applicant's appear to only have support for the working examples of the specification (Examples 1-3). However, these working examples fail to provide any conclusive data as to the numerical values of a, b, and c; determination of these values require that the commercially available starting materials KF-86, X-22-3939A, and KF-393 are defined in terms of the numerical values of a, b, and/or c. This information is required for Applicant's to have full support of the working examples.

#### Response to Arguments

Applicant's arguments, see pages 16-18, filed on August 23, 2007, with respect to claim 2 have been fully considered and are persuasive. The examiner agrees that the presence of the

Application/Control Number: 10/534,399

Art Unit: 1709

amino spacer does render the compounds of instant claims 2, 4, and 5 novel and unobvious. The

prior art rejections have been withdrawn. However, claims 2, 4, and 5 are rejected under the new

grounds of rejection cited above.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Loewe whose telephone number is (571) 270, 3298. The examiner can normally be reached on Monday through Friday from 9:30 AM to 7:00 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Eashoo can be reached on (571) 272-1197. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
